Three-Quarter Length Is Adopted GOWN FOR THE DEBUTANTE for Sport Garmer.t.

Colors Continue to Be Dull, but New Note is Expressed in Brilliant Linings.

While the real long coats are still in favor for the coldest weather, the very latest models are said to be shorter. The first and foremost reason for this is that probably very few women wish to appear even a trifle wider at the bottom skirtline than is absolutely necessary. Another hint as to coats is the new straight line which is now suggested. Sport coats have already adopted this new form and the result is a return to the three-quarter length box coat of a few years ago.

Any real changes, however, are not due for many months, and contradicting the straight-line theory comes a persistent rumor that Alsace-Lorraine is to be the next field of operations in fashions, although it is hard to see exactly where the far from artistic costume of this province can be reconciled with the present modes.

Paris fashions have glways their little fling at the passing events, but spring is a long way off, and should another country come suddenly for-ward and a diplomatic compliment be considered due, it would upset all previous calculations. For fashion may be as fickle as she pleases in war or peace, so there is no knowing what may happen between now and springtime in fashions, which is early in February.

To return to the subject of coats Whatever the length or width the colors continue to be dull, if not uninteresting, and this has led to the new note expressed in brilliant linings. Two good reasons for these decidedly WINTER AND SPRING MODELS chie linings exist. The first is as stated, that matters were becoming a Straight Lines and Trimmed With Fur; bit dull, and the second reason is that there seemed no other way to use the very beautiful silks both the American and French designers were turning out. "Ladies must live," but so must designers, and there seems to be no way out of it except to admit that our designers are true artists, and sheer admiration for their work is its own excuse for using their wares.

The plainer the suit or coat the more apt to be brilliant coloring in the lining. Sinshes in the jackets and panels and tunics are further reasons wishing to add a dash of color.

On a very original new suit with a rather short jacket both fur and lining contributed to the extremely clever air jacket was straight and ungathered and a brilliant red taffets lining made a strong contrast to the dull metri shade cloth. Even the high double rolling collar of the beaver fur was lined with the red, flashes of which also showed in the stashes of the pep-

TRICOLETTE IS NOW TO FORE ernoon Frocks: Good for Wear Under Heavy Coat.

Tricolette has come very much to the fore as a dress material. A number of new afternoon frocks, on the order of a very beautiful model of black tricolette which Calot brought out last season, are being sponsored by well-known American designers, and these are particularly good for wear under a heavy coat, as they do not muss and are not so bulky as to distort the line of the outer garment. Heavy coarse jersey is also being used for frocks, and there is a new fishnet jersey which has just come from Paris and which promises to have quite a vogue. Among the novelties in the more formal silks are new metal brocades, the weaves of which are replicas of the coats of mali worn in medieval days. These are interesting and distinctively new.

The tunic was a masculine fashion, as most garments are that women purchase. Its fabric and the ornamenthink are their own. The critics of tation put upon it bring the cost well this generation fall upon women and up beyond the average purse. But the smite them hard for their fripperies and frivolities, the whims and caprices of their clothing, and yet these critics are men who do not seem to realize that all the centuries of progress of the male part of the human race were given over to caprice and brilliancy in apparel, as well as to defeat and victory in arms. War and the Primitive Tunic.

No doubt the clash of arms in France brought back to the 1 inds of the designers the long centuries of warfare that had preceded the peace since 1870. The tunic was the fundamental part of the British warrior's costume, and the cuirass-that glittering breastplate of steel and highly polished metal-was the symbol of all fighters. So France introduced the tunic of that other and primitive warfare which she thought had gone forever, and suddenly found one August morning that it had come to her with all the cruelty of the early centuries.

She did her best to enforce this tunic luto the fashions of other countries, but with small measure of success until late this autumn. After steady persistence, a trick she has in the making of all her forms of art, the least of which is fashion, she found that America had saddenly awakened to the comfort and beauty of this garment.

It is difficult to persuade American omen to go without shirtwaists. They borrowed the idea of a wash shirt from man, as they have borrowed all their fashions, and they felt, and rightly so, that there is an element of cleanliness in putting next to the skin throughout the day hours a garment that can go to the tub. The tunic does not go to the tub, and the only way to keep it entirely fresh is to wear it over a long-sleeved muslin lining, which many Practical and Ornate Blouses.

The tunic and the outside blouse are of the amateur, especially if she is one and the same thing. You may call guided by this hasty description, for

STOCKING'S STORY.

"I am a stocking." "So are we," said some of the other stockings in the bureau drawer. "But I am-well I am a stocking," said the first stocking. "So you said before."

"It's worth saying again," the first stocking answered. "We don't see why you're so proud,"

the other stockings said. "You're rather useless. You haven't any mate. And you're white. You're not made of a nice material. You're very coarse and strong."

"That is just what I like," said the stocking. "You don't mind not having a mate?" the others asked.

"I don't mind in the least," said the stocking. "And you don't mind it because you lie in the drawer doing nothing, while we are taken out and worn and washed and darned and put back again? We start in the shops, we then go into packages and arrive at

different homes. "Next we are worn, then we are washed, mended and put with our mates back in the bureau drawer." "You said all that before," said the white stocking.

"Well," said the other stockings, "you said the same thing twice." "I'm important," said the white one. "Important!" said the others. 'You're important doing nothing. Why

from-But the white stocking interrupted. "Yes, I've heard how you're worn, washed, mended and worn again. I've heard that enough times."

we have the same interesting rounds-

"Then why did you say it yourself?" the stockings asked. "So as not to hear all of you saying

it again," the white stocking answered, "Poor excuse," the stockings said. "You're not years old as I am," said the white stocking.

"We wouldn't want to be," the others said. "There comes a time in the life of every stocking when it has had enough of darning and when, in fact, there are more darns upon it than stocking. That is the time when

we're old. We're not proud of being old, for it means that younger and newer stockings are taking our places. They're being called 'Best stockings.' and 'Good stockings,' while we're known as the 'Old stockings.'

"But we've had some fun in our ives whereas you, poor old stocking, you don't do anything. "We walk and go over the earth-

not all of it but a great deal of it. We sometimes are very idle when we go a-driving or a-motoring. We sometimes fall down and have a fight with the earth and we come off with a good old rip." "Now," said the white stocking, "I've

listened politely to your story, though none of it was new to me. I know all about the life of the average stocking. First, there are the blouses of leather, You say I am old. You say I am usewhich were shown in America a month less. You say I am course and entireago, with and without sleeves. They ly too strong to be a nice stocking. came out with the leather top coat and You would rather be beautiful for the service coat of peltry and leather. awhile even if other stockings took As a rich sister to the practical your place than you would to be good leather blouses are those of colored and strong and last for years and years. And you pity me because I broidered all over the surface. These haven't a mate. are worn with long, narrow black and

"But you don't understand. I am a Christmas stocking. I am big and strong so I can hold things-not ordinary things such as feet which any stocking could hold-but I hold toys. Yes, I have nuts and raisins and oranges and a bright penny and a doll and a game and a number of other things put in me every year. For once a year I am taken out-and that time will come soon now.

In this lies the remedy that will not only take care of a multitude of those who may not be able to return to their former occupations, whose desires are not to do so whose health prohibits them from indoor life or whose outdoor habits from e nost one, two, three or fo have given them such a taste and desire for it that confinement would be unbearable. Farm life will thus appeal to them, and the indications are that it will be taken advantage of by thousands. It means much to them as well as to the continent of America that provides the opportunity to the world at large, and to the stricken and famished nations of Europe, who, not only today, but for years to come, will require the sustenance that can only

There is little need here to direct attention to the wealth that has come to the farmers of Canada within the past few years. It is not only in grain growing that unqualified and almost unequaled success has followed honest effort, but the raising of horses, cattle, sheep and hogs has been a large source of profit. These are facts that are well known to the many friends and acquaintances of the thousands of farmers from the United States who have acquired wealth on the prairies of Western Canada. Farms of from one hundred and sixty to six hundred and forty acres of the richest soil may be secured on reasonable terms, and with an excellent climate, with a school system equal to any in the world, and desirable social conditions, liftle else could be asked.

Canadian statesmen are today busily engaged planning for the future of the returned soldier with a view to making him independent of state help after the immediate necessary assistance has been granted, the main idea being to show in the fullest degree the coun try's appreciation of the services he has rendered.

But now that the war has ended, and

the fact apparent that of all avocations the most profitable and independent is that of the farmer, there will be strong desire to secure farm lands for cultivation. Canada offers the opportunity to those seeking, not as speculation but as production. The deepest interest is taken by Federal and Provincial authorities to further the welfare of the farmer and secure a
